PROFESSIONAL SUMMARY

Cybersecurity-focused aspiring SOC Analyst with hands-on experience in SIEM monitoring, threat detection, incident response, and security operations workflows. Skilled in Splunk, Python, IOC analysis, MITRE ATT&CK mapping, UEBA, insider threat detection, and threat intelligence enrichment using APIs and AI-driven automation. Experienced in alert triage, log analysis, incident reporting, and building SOC investigation platforms. Seeking an entry-level SOC Analyst (L1) role to strengthen enterprise security operations.

WORK EXPERIENCE

AI Cybersecurity Intern

Rooman Technologies | Remote (Bangalore)

February 2026 – May 2026 (4 Months)

- Built AI-driven SOC solutions for insider threat detection, anomaly detection, phishing analysis, and incident response using Python, ML, and Streamlit dashboards.
 - Automated log parsing, alert triage, IOC enrichment, and threat intelligence workflows using VirusTotal, AbuseIPDB, and MITRE ATT&CK mapping.
 - Analyzed security logs, user activity, and network events to detect suspicious behavior, privilege misuse, and attack patterns in SOC environments.
 - Developed real-time monitoring dashboards for alert management, risk scoring, threat investigation, and security reporting for SOC analyst workflows.
 - Worked on cybersecurity datasets for intrusion detection, behavioral analytics, and AI-powered threat investigation aligned with SIEM operations.
-

PROJECTS

VEILGuard (Vigilant Enterprise Insider Leakage Guard) – ([VEILGuard](#))

Rooman Technologies - Internship Project

- Built an insider threat detection platform using UEBA, Isolation Forest, and rule-based detection for anomalous behavior and privilege misuse monitoring.
- Implemented risk scoring, MITRE ATT&CK mapping, and real-time alert generation for insider threats, data exfiltration, and abnormal access patterns.
- Developed a What-If Attack Simulator to model insider attack chains, estimate business impact, and support proactive defense planning.
- Integrated Groq LLM for AI-powered SOC analyst reports, threat explanations, remediation recommendations, and automated incident documentation.
- Designed a Streamlit dashboard for user behavior profiling, alert monitoring, risk distribution, and high-risk entity investigation workflows.

CybersDen - SOC Analyst Toolkit ([CybersDen](#))

- Developed an end-to-end SOC toolkit for IOC validation, phishing detection, log analysis, and real-time threat intelligence enrichment workflows.
- Integrated VirusTotal, AbuseIPDB, and IPInfo APIs for automated IP, domain, URL reputation analysis, and faster security investigations.
- Built AI-powered modules for IOC classification, phishing analysis, MITRE ATT&CK mapping, and automated incident report generation using LLMs.
- Implemented anomaly detection for brute-force attacks, port scanning, suspicious logins, and malicious behavior across security event logs.

- Created a Streamlit-based SOC dashboard with case management, alert triage, PDF reporting, and analyst investigation support features.

An Intelligent Network Intrusion Detection and Analytics System – ([Major Project](#))

Major Project

- Built a multi-class Intrusion Detection System (IDS) using the CICIDS-2017 dataset (2.5M+ records)
- Performed data cleaning, feature engineering, model training, and evaluation
- Applied Random Forest & ensemble models achieving 99.86% F1-score
- Implemented imbalance handling techniques for improved detection accuracy
- Tools: Python, Pandas, Scikit-learn

SIEM Log Analysis & Threat Detection using Splunk

Devtown Splunk Bootcamp

- Created dashboards and alerts to monitor suspicious login and brute-force activities
- Used SPL queries for log investigation and incident analysis
- Created detection rules for brute-force attacks and suspicious login behavior using SPL queries
- Improved response visibility through automated alert workflows

TECHNICAL SKILLS

- **Security & SOC:** Splunk SIEM (Dashboards, Alerts, Log Analysis), Wazuh, SIEM Monitoring, Wireshark, Network Traffic Monitoring, Incident Response, Log Correlation, Threat Detection, Alert Triage, Playbooks, SOC Operations, MITRE ATT&CK, Threat Intelligence, UEBA (User and Entity Behavior Analytics), Insider Threat Detection, EclecticIQ (EDR – Endpoint Response)
- **AI/ML for Security:** Intrusion Detection, Anomaly Detection, Classification (Scikit-learn), Isolation Forest, Behavioral Analytics, Risk Scoring, Rule-Based Detection
- **Programming:** Python, SQL
- **Platforms & Tools:** Git/GitHub, Linux, Active Directory, Azure Entra ID, Google Colab, VS Code, Streamlit, VirusTotal API, AbuseIPDB API, IPInfo API, Groq LLM
- **Networking:** TCP/IP, Ports, Protocols
- **Productivity Tools:** Microsoft Office (Excel, PowerPoint, Word)
- **Professional Competencies:** Leadership, Team Collaboration, Time Management, Project Coordination, Effective Communication, Critical Thinking

ACHIEVEMENTS & CERTIFICATIONS

- SOC Analyst Learning Path – LetsDefend
- Cybersecurity Defence Analyst – Cisco Networking Academy
- Splunk Bootcamp / Splunk Fundamentals – Devtown
- TATA Cybersecurity Analyst Simulation – Forage
- Datacom Cybersecurity Operations Simulation – Forage

EDUCATION

B.E in Artificial Intelligence and Machine Learning

AMC Engineering College

- 2022 – 2026 | Bangalore, Karnataka

12th Science

New Baldwin International PU College

- 2019 – 2021 | Bangalore, Karnataka

10th Standard

M.Tres High School

- 2018 – 2019 | Bangalore, Karnataka
